Create tousled waves

Bored of the same style you've sported every day? Want seductive, tumbling waves? Seema shows you how to change your look.

1 Step 1
Wash your hair with a volumising shampoo. Skip the conditioner if your hair is well nourished and doesn't feel dry. The idea is to work with healthy hair but you don't want to weigh it down with too much conditioner.

2 Step 2
Spray volumising spray all over your hair. Blow-dry with your head bent forward so that your hair has some movement. Avoid combs and brushes, as this style works best if it looks natural.

Romantic waves to recreate the magic

Here's a good option for those of you who are tired of a sleek fringe.

1 Step 1
Clip your fringe away neatly and comb mousse through the rest of your hair. Twist sections of your hair and pin them. Now, blow-dry the pinned sections.

2 Step 2
Remove the pins and rake your fingers through your hair to create glam waves. Unclip your fringe and let it fall onto your forehead for a soft, romantic look.
